Our meeting

The meeting brings together experts in **Bioinorganic Chemistry, Cell Biology, Immunology and Virology, Genetics, Biophysics, Medicinal Chemistry and Computational Methods**. They will share knowledge and latest discoveries covering biogenesis, structure, and function of **FeS cluster** containing proteins in **host immune response and pathogens**. Through cross-fertilisation of these fields the meeting aims to bridge the gap between bioinorganic chemistry and immunology/virology. It will set the grounds for future collaborative works.
